DOW® SEALANTS, INSULATIONS AND ADHESIVES SIGNATURE PRODUCT

1. Dow® Froth-Pak® Two Component Foam

Froth-Pak® is a foam machine in a carton. Chemical curing allows two-part polyurethane foam to be dispensed, expand and become tack-free in seconds. Froth-Pak® will skin over in 30–40 seconds and be completely cured in under one minute. Froth-Pak® is typically used as a foam-insulating sealant to fill cavities, wall and floor penetrations, cracks and expansion joints.

DOW® WEATHERMATE™ WEATHERIZATION

SIGNATURE PRODUCT

1. Dow® Weathermate™ Sill Pan

Weathermate™ Sill Pan is a translucent, molded polymer that is manufactured to ensure a consistent thickness. It will not rust or rot and is compatible with standard adhesives and sealants. It provides seamless protection at sill corners and assists positive drainage of water to the exterior. The two-piece design adjusts to fit most window sill widths.

Part Code	Description	List	Approx Wt
W-DSP5	5" h x 3-3/4" d x 32" w 3/8" h backdam	CALL	1 lb

2. Dow® Weathermate™ Construction Tape

Weathermate™ Construction Tape is recommended to seal the joints and seams of Styrofoam™ Weathermate™ housewraps and Styrofoam insulated sheathings. In these applications, Weathermate™ Construction Tape enhances resistance to moisture and air infiltration. The tape can also be used to repair damaged foam insulation or housewrap, reducing material costs and job-site waste.

5. Dow® Weathermate™ Housewrap—Plus NEW!

Weathermate™ Housewrap—Plus is a non-woven, non-perforated, polyolefin-based housewrap that offers exceptional tear resistance and durability. It is an effective option for builders who prefer to use non-insulating sheathing along with housewrap. When installed over sheathing, Weathermate™ Housewrap—Plus reduces costly air and moisture infiltration. It is translucent to allow a clear view of the studs and the sheathing surface during installation.
